Reviews

Completely essential go through ebook. It is definitely basic but shocks in the 50 percent from the publication. I am delighted to let you know that this is the best pdf i have go through inside my individual lifestyle and can be he best pdf for possibly.

Condition: New. Publisher/Verlag: Springer Netherlands | In order to give a more coherent theory behind plant mineral nutrition, this book offers an explanation of the essentiality of chemical elements in biological systems and the application of stoichiometric network analysis to the biological system of elements. | Earlier works on plant essential elements have revealed a series of complicated, counter-intuitive relationships among various chemical elements in different plant species, due to both unlike usage of certain elements in plants and to different carriers effecting resorption and transport. In an attempt to provide a more coherent theory behind plant mineral nutrition, this groundbreaking book adopts a very different approach from the existing literature, presenting an explanation of the essentiality of chemical elements in biological systems and the application of stoichiometric network analysis (SNA) to the biological system of elements. Starting with data from biochemical environmental analysis, and a discussion of the phenomena involved in metal ion partition and autocatalytic behaviour, conditions and criteria controlling the partition of metals into biomass are investigated. Several rules are derived and investigated in terms of their interaction both in comparisons among contemporary organisms and in terms of evolution. This allows the construction, for example of a map which directly traces the biological feature of essentiality to parameters of coordination chemistry. The book will have worldwide appeal for researchers interested in fields such as soil/plant interactions, bioinorganic chemistry, plant nutrition, phytomining, bioremediation, biogeochemistry, nutrient cycling, soil chemistry, and cellular physiology. | Introduction.- 1. The biological System of Elements. - 1.1. Principles of Element Distribution in Plants.- 1.1.1. Distribution Patterns of Chemical Elements in Plants.- 1.1.2. Biochemical Essentiality of Elements in the Light of Enzymatic Reactions.- 1.1.3. Soil and Geochemistry: Support and Storage/Buffer System for Biology.- 1.2. Methodology of Inquiries into the Biological System of Elements.- 1.2.1. Correlation Analysis of...
