Brill, Netherlands, 2004. Paperback. Condition: New. Language: English . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. The present textbook attempts to provide a first and at the same time comprehensive introduction to the idea and significance of human rights, its philosophical and theoretical foundations, historical development, the main structures and procedures of international human rights protection by the United Nations and regional organizations (Council of Europe, Organization of American States, African Union, OSCE and others), and modern trends, such as preventive mechanisms, international criminal law, human rights as essential elements of peace-keeping and peace-building operations, humanitarian intervention or the relationship between human rights and terrorism. The book perceives human rights as an inter-disciplinary topic and illustrates the theory of human rights with a considerable number of practical case-studies, graphics, statistics, procedural charts and textboxes. It serves as a textbook for students of law, political science, international relations and other academic fields related to human rights, but may as well be used as a first introduction for those working in the field, for NGO activists, legal practitioners and others interested in the fascinating world of universal human rights.
