MOLYBDENUM OXIDE & MESOPOROUS SILICA METATHESIS CATALYSTS

Molybdenum oxide &
mesoporous silica
metathesis catalysts
New catalysts for alkene metathesis and alkyne
polymerization

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | New catalysts for alkene metathesis and alkyne polymerization | Alkene metathesis attracted recently much attention, especially with the 2005 Nobel prize awarded for the development of the metathesis method in organic synthesis. Supported molybdenum oxide catalysts are widely used in industrial petrochemical processes, including metathesis (e.g. Phillips triolefin process, Shell higher olefin process). The present work discloses new type of metathesis catalysts based on molybdenum oxide supported on mesoporous silica. The key...

Reviews

This publication will be worth purchasing. This is for all those who statte there was not a worthy of reading through. I discovered this publication from my dad and i suggested this pdf to find out.

-- **Macey Cummerata**

The ideal ebook i possibly go through. It generally does not cost an excessive amount of. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Vincenza Hand**

Complete information for publication fanatics. It is actually rally intriguing throug reading period of time. I am happy to explain how this is actually the greatest publication i actually have read inside my own daily life and may be he finest ebook for possibly.
