

Pigmentation: As You See It

By Fidelia Iwegbu

iUniverse, United States, 2012. Paperback. Book Condition: New. 203 x 127 mm. Language: English . Brand New Book ***** Print on Demand *****.Is there anything that has not been turned into colors? Or is there anything that could not be turned into colors? How far can we go with our love for beautiful colors? We all have favorite colors which make it easy, when we walk into a shop to buy things that comes in many colors; we just opt for our favorite colors without being overwhelmed by the many colors. Colors have transformed how we see the world around us and it looks different to us today than it did to previous generation that for example watched black and white television. Our world is now saturated with different kinds of colors. As we look around us and loving the colors and enjoying what we see, we must not fail to give credit to what allows us to see the colors which are lights. According to scientist Sir Isaac Newton s research, it defines color as a perceptual characteristic of pure light that passes through a prism. And, the lights composed of many colors. He found that each color is...
