Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Gas, Gasoline and Oil-Engines: A Complete, Practical Work Defining Clearly the Elements of Internal Combustion Engineering; Treating Exhaustively on the Design, Construction and Practical Application of All Forms of Gas, Gasoline, Kerosene and Crude Petroleum-Oil Engines; Describes Min A book representing and illustrating the details of design, manufacture, and management of a new and progressive prime moving power, falls behind its time by age, and, therefore, needs rearrangement and additions to bring its text and illustrations up to date in all the departments of such progressive industry. There is probably no more important mechanical development involving the production of motive power for all purposes within the age of steam than that of the explosive motor and its far-reaching effect in the promotion of industry by supplying a cheap, reliable. Easily understood source of power. So quickly has this new power expanded to almost universal usefulness as a labor-saving element in the lesser industries, that the literature of the past is found lacking in its up-to-date needs. Progress and improvement are the drift of genius in this advanced age. The advancement evidenced in adapting crude petroleum as fuel for explosive power, together with the rapid development of the producer-gas industry, have given a new economy in the production of power, while the use of the hitherto neglected gaseous elements of the blast-furnace and coke manufacture have added new sources of power production at a nominal cost. Discussions of the producer, blast-furnace, and coke-oven gases. Which are now coming to the front on a large scale for economic power, are included in this work, while crude petroleum and its conversion into power is also described and illustrated at length. It has a...
