Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from The Berlin-Zossen Electric Railway Tests of 1903: A Report of the Test Runs Made on the Berlin-Zossen Railroad in the Months of September to November 1903 The tests on the Berlin-Zossen line recorded in this volume occupy a unique place in the history of modern engineering. They represent a deliberate, thoroughly organized and highly successful effort, on the part of a syndicate for research, at solving the greatest problem of twentieth-century transportation; that is, the application of electric traction to very greatly increased railway speeds. The subject has been in the air for more than a decade, and has stayed there, mainly on account of the lack of sufficient experimental data to justify the large investments necessary to such operations. More than a dozen years ago the projected fast line between St. Louis and Chicago brought the subject before the public eye, and had not the ensuing period of extreme commercial depression forced it into the background that line would very probably have become a successful reality. The writer was one of the group of...
