Alumina is seldom critical unless present in large amounts and is commonly useful in the cement industry. P820} or total iron is a harmful component in the glass, filler, and some chemical industries. For some of these uses, the iron content must not exceed a few hundredths of a percent or, at most, one or two-tenths of a percent. In these low concentrations, most analytical methods are relatively less accurate than in higher concentrations; and, for these purposes, the iron content should be carefully rechecked.
