

Creation: Towards a Theory of All Things (Paperback)

Filesize: 1.06 MB

Reviews

It is one of my personal favorite books. It is one of the most incredible ebooks I have ever read. You will not feel monotony at any moment of your own time (that's what catalogues are for relating to if you ask me).

(Giuseppe Mills)

Booksurge Publishing, United States, 2005. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.This book tells the story of the creation of the Universe, the creation of our solar system and the formation and development of plant and animal life on Earth, prehuman hominids and the eventual creation of our species, Homo sapiens, 200,000 years ago in East Africa. It offers analysis of the evidence as to the crop circles and their origins and as to extraterrestrial intelligent life in the cosmos. Creation reconciles creationism with science and the theory of evolution. Human beings are not descended from modern apes, but prehuman bipedal hominids were evolved by God from a common ancestor 7 million years ago. Although Darwin s fundamental thesis that all life shares common ancestors is correct, it does not follow that species originate from natural selection. The Universe really is 13.7 billion years old and commenced with the Big Bang. The Big Bang expansion is still ongoing and galaxies continue to rush away from each other. Earth really is 4.54 billion years old. But what caused the Big Bang? And what caused complex life to develop on Earth but nowhere else in this sun system? Why have the Martian Rovers uncovered no fossils or even a shellfish on Mars although oceans once covered that planet s surface? Why are three-quarters of the Earth s surface covered with water?.
