DETECTION MECHANISM OF REDUCING GASES AND INFLUENCE OF WATER ON TIN DIOXIDE BASED GAS SENSORS : DIFFERENCES IN SURFACE CHEMISTRY BETWEEN UNDOPED AND PLATINUM DOPED MATERIALS

Shaker Verlag Jan 2013, 2013. Taschenbuch. Condition: Neu. Neuware - One of the main problems of undoped SnO₂ based sensors in real life applications is their lack of selectivity and the most encountered cross interference comes from the water vapor. Its effect is twofold: it decreases the sensor resistance and its presence in various concentration changes the response magnitude under exposure to identical target gas concentrations. It is also known that the addition of small quantities of noble metals has...

Reviews

Thorough manual! Its this kind of excellent study. It really is written in straightforward terms and never difficult to understand. I am very happy to inform you that this is basically the very best pdf we have read through during my individual existence and could be the greatest ebook for possibly.

-- **Dr. Arno Sauer Sr.**

This written book is excellent. it absolutely was written extremely completely and useful. You may like how the article writer write this ebook

-- **Dayton Stracke I**

It is really an awesome ebook which i have ever go through. It is actually written in straightforward terms and not confusing. I am very easily could get a satisfaction of reading a written ebook.
