

Publications of the Astronomical Society of the Pacific Volume 6

Filesize: 6.81 MB

Reviews

It is straightforward in read through preferable to fully grasp. It is really simplistic but excitement in the 50 percent of the pdf. Your life span will be enhance once you comprehensive looking at this pdf.

(Jorge Hammes)

PUBLICATIONS OF THE ASTRONOMICAL SOCIETY OF THE PACIFIC VOLUME 6

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1894 Excerpt: .of the college in 1865. The equatorial telescope has an objective of 12 inches aperture and a focal length of 16 feet. It was originally made by Fitz of New York, but in 1872 the glass was re-cut by Clark, and in 1888 the telescope was re-mounted by Warner Swasey. It was also at that time provided with electrical illumination for the filar micrometer. The magnifying powers, negative and positive, range from 150 to 600. A spectroscope made by Brashear was added in 1890. This spectroscope has a prism for star spectra and a Rowland grating for the solar spectrum. There is also a Browning direct-vision spectroscope. The transit circle has an objective aperture of 3 inches. It was made by Young of Philadelphia. In 1889 it was re-mounted by SaegMuller. The clock and chronograph are of Bond manufacture. Beside the mounted instruments, the observatory has two portable telescopes of 3 and 6-inch apertures, both made by Clark; also a universal instrument from Wanschaff of Berlin. The instruments are used almost altogether for purposes of instruction. There are three classes in each college semester. The portable telescopes are exclusively devoted to class uses, and the spectroscope is at present (1894) serving the needs of a class of seven in solar physics, who are required to themselves observe the phenomena discussed in the lecture. The second-year-students in astronomy have practical instruction with both the meridian and equatorial instruments. Therefore only such occasional independent observations can be made...
