

coding theory + - algorithms. architectures and applications

By DE) NUO YI BAO ER (DE) FU LUO YI DENG BO GE (DE) KU EN ZHANG ZONG CHENG /(DE)Andre Neubauer (DE)Jurgen Freudenberger (DE)Volk

paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 258 Publisher: Posts Telecom Press Pub. Date :2009-08. coding theory and digital communication systems one of the key storage medium. it is not in a noisy environment. and reliable space-time communication channel for information provides a method of transfer. Coding theory: algorithms. architectures and applications. describes the basic architecture of communication systems and information theory. basic knowledge. details of several current most widely applied method of channel encoding and decoding. both the standard encoding methods such as block codes . convolutional codes. but also including the current study and improve the encoding methods. such as Turbo codes. LDPC codes and space-time codes. Coding theory: algorithms. architectures and applications. focused on the structure and pattern of the relationship between theory and performance evaluation. and codec standards. as expressed in coding theory algorithms. signal processing and related applications provide a unified framework. the main line clear and practical. Coding theory: algorithms. architectures and applications for those who want to learn more coding theory and its associated communication systems in the current application of engineering and technical personnel of great reference...
