

The Linguistic Basis of Text Generation (Paperback)

Filesize: 1.68 MB

Reviews

The most effective ebook i possibly go through. I am quite late in start reading this one, but better then never. Its been designed in an extremely basic way and it is just after i finished reading this ebook by which basically transformed me, modify the way i believe.

THE LINGUISTIC BASIS OF TEXT GENERATION (PAPERBACK)

[DOWNLOAD](#)

CAMBRIDGE UNIVERSITY PRESS, United Kingdom, 2009. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.This study presents an original and penetrating analysis of the complex problems surrounding the automatic generation of natural language text. Laurence Danlos provides a valuable critical review of research in this important and increasingly active field and goes on to describe a theoretical model that is thoroughly grounded in linguistic principles. The model emphasises the semantic, syntactic and lexical constraints that must be dealt with when establishing a relationship between meaning and form and it is consideration of such linguistic constraints that determines Danlos generation algorithm. The book concludes with a description of a generation system based on this algorithm which produces texts in several domains and also a system for the synthesis of spoken messages from semantic representation. The book is a significant addition to the literature on text generation and will be of particular interest to all computational linguists and AI researchers who have wrestled with the problem of vocabulary selection.
