Tantor. No binding. Book Condition: New. MP3 CD. Dimensions: 7.5in. x 5.1in. x 0.6in. Based on a groundbreaking synthesis of recent scientific findings, critically acclaimed New York Times science reporter Nicholas Wade tells a bold and provocative new story of the history of our ancient ancestors and the evolution of human nature. How did our ancestors break out of Africa and defeat the more physically powerful Neanderthals who stood in their way? Why did the different races evolve, and why did we come to speak so many different languages? When did we learn to live with animals and where and when did we domesticate man's first animal companions, dogs? How did human nature change during the thirty-five thousand years between the emergence of fully modern humans and the first settlements? This will be the most talked about science book of the season. This item ships from multiple locations. Your book may arrive from...
