Cullen Morris, Engineer of Construction, I have made tests to determine the relative rates of corrosion of sample plates of such grades of iron and steel as are commercially available for holder and tank construction, when subjected to similar conditions to which plates of gas holders and tanks are ordinarily subjected in practice, and I beg to submit herewith the results found. Ten plates, each approximately 6 in. by 12 in. by 1/8 in. in size, were obtained of each of the seven materials.
