American Psychiatric Association Publishing, United States, 2011. Paperback. Condition: New. Language: English . Brand New Book. This volume collects his recent work in several areas: severe personality disorders, couples in conflict, and religious experience. In each area, he explores the relationship between the psychoanalytic, clinical psychiatric, and neurobiological approaches, yielding insights and analysis that are compelling, thought-provoking, and at times startling in their penetrating brilliance. This systematic approach provides insight into the nature of passionate love and the psychodynamic features of the love relationship; Â Addresses psychodynamic factors in the religious experience and the search for universal ethical values, and explores the crucial function of religious experience in dealing with the ideological challenges of social life; andÂ Identifies the serious problems facing psychoanalytic education, institutions, and the profession of psychoanalysis, and proposes solutions to energize the field and increase its contributions to scientific research and progress.
